Protect your personal information in public WiFi hotspots. Public WiFi is just that – public. Private WiFi makes you invisible.

## PRIVATE WIFI VPN ENCRYPTION

Given the inherent security risk of public Wi-Fi, and our propensity to use unsecured access to the Internet, VPN encryption is a perfect solution to a serious problem. Primary benefits include:

- Intelligent activation automatically secures any Wi-Fi connection.
- The only way to protect against hackers in public Wi-Fi is to encrypt all internet communication.
- Essential protection for today's mobile lifestyle.
- Simple, modern and easy to use.
- VPN keeps your personal information safe and secure wherever you are.
- Encryption that works everywhere in the world.
- VPNs cloaks an actual IP address, making it harder for advertisers (or spies, or hackers) to track users online.

### The Problem

#### *Public WiFi networks are not secure*

Three out of four people have used public WiFi hotspots in the last twelve months. Yet most don't realize that WiFi signals are just radio waves. Anyone in range can "listen in" to all of the data you send and receive, as easily as tuning to the right station. And antivirus or firewall software can't protect you.

#### *Hotspots are Easy to Hack*

Coffee shops. Hotels. Airports. It doesn't matter what kind. No public WiFi hotspot in the world is secure. A report from NBC's TODAY show reveals how easy it is to hack a public hotspot using a normal laptop and simple software. And in a CBS News segment a reporter has her password stolen out of thin air while using a café's free WiFi connection.

#### *Your Private information is exposed*

Your usernames, passwords, Facebook account details, and other confidential information can literally be stolen out of thin air. When asked about potential issues with using free public WiFi, 88% surveyed in a 2014 Harris Poll mentioned identity theft – yet 39% still admitted to accessing or transmitting sensitive information over public WiFi despite the risks.

## To Activate Your Private WiFi:

- Sign into [preferred.mylifebenefits.org](http://preferred.mylifebenefits.org) and follow the link to "Private WiFi"
- Complete the enrollment steps to activate up to three devices!
